WORK EXPERIENCE

Associate Software Engineer(Frontend Developer) Prodapt Solutions

12/2021 - 04/2022

Bengaluru

Achievements/Tasks

- Spearheaded the development of critical components within the Dashboard Project during an interim period between projects.
- Successfully implemented new components, enhancing the project's overall functionality and user experience.
- Collaborated closely with the development team, contributing innovative ideas and solutions to improve the project's design and performance.

Associate Software Engineer(Full-stack) Prodapt Solutions

06/2022 - 04/2023

Bengaluru

Achievements/Tasks

- My role at BTC Loyal involved the development and implementation of a web application for promotion eligibility tracking. Here are some key accomplishments
- I created navigation pages driven by registered mobile numbers, ensuring smooth user interactions and easy access to relevant information
- I developed customer-centric dashboards to display essential customer metrics, providing insights and enhancing user engagement
- I designed tables to showcase customer subscriptions and promotion levels based on tiers, streamlining the process of tracking and managing promotions
- Web Application Implementation: I have hands-on experience implementing various web applications, including Proof of Concepts (POCs) for projects such as the RNOC Dashboard, Flow Form Application

Salesforce Production L2 Support Prodapt Solutions

05/2023 - 07/2023

Bengaluru

Achievements/Tasks

- As a Salesforce Production Support and Development at Prodapt, I will be a key member of the IT team responsible for ensuring the smooth operation of the Salesforce ITS project. My role will encompass both production support, where I will resolve issues in real-time and small-scale development efforts aimed at enhancing the project's capabilities
- Production Support Provide Level 2 support for the Salesforce ITS project, addressing and resolving issues promptly to minimize downtime and disruptions
- Issue Resolution Investigate, diagnose and resolve technical issues reported by users or detected through monitoring systems, ensuring the project's continued functionality
